3). Replay--SD card or Cloud Storage

You can choose the SD card or Cloud storage and choose the data to playback.

6. Cloud Service

1). After buying the cloud storage service, all alarm videos will be saved on the cloud server and can be downloaded or viewed online. When sending the alarm information, you can select not only photos to view but also one-key playback of the cloud alarm video. If you do not buy the cloud storage service, you can go to the SD card to retrieve the alarm video.

2).AI human detection function, after buying the bound AI cloud storage service package, the alarm mode is AI human detection. The AI human recognizes the human figure in the picture by the deep neural network system, and the alarm is triggered before someone passes the camera, which greatly reduces the false alarm rate, and any wind blows, Animal walking will not trigger the alarm system.
